

AJITH GOPI

Full Stack Engineer | Node, React, MongoDB, SQL, Next.JS

☎ (+971) 555-166-278 | ✉ ajithgopiklm@gmail.com | 🔗 ajithgopi | 🌐 LinkedIn | 🌐 agopi.in

Professional Summary

- **Full-Stack Developer** proficient in **JavaScript (ES6+)**, **TypeScript**, **React**, **Next.js**, and **Tailwind CSS**. Experienced in backend development using **Node.js**, **PHP (Laravel)**, and **Python**.
- Expertise in **Cloud Infrastructure (AWS)**, **Microservices architecture**, and **CI/CD pipelines** for scalable distributed systems.
- Strong **Database Administration** skills with extensive experience in **Schema Design** and **Query Optimization** across **SQL (MySQL, PostgreSQL, MariaDB)** and **NoSQL (MongoDB, DynamoDB, Redis, Neo4j)** environments.
- Skilled in **UI/UX Design principles**, focusing on creating high-fidelity, intuitive **GUI** interfaces with a detail-oriented approach to user experience.
- Proven track record of delivering **innovative full-cycle projects**, including **Graph data dashboards**, **game server panels**, and **IoT/multimedia automation systems**.

Education

Mahatma Gandhi University (7.7 CGPA)

Kottayam, India

Bachelor of Computer Application

2016 - 2019

Professional Experience

Emirates NBD (via Synechron Technologies)

Dubai, UAE (11/2024 - Present)

- Developed full fledged corporate banking applications for management of Relationship manager's daily jobs, and deal management.
- Used React and Node (Custom Internal frameworks) to build full fledged application and given support in deployments.
- Used MongoDB as the primary application database while also using OracleDB for reading data directly from other shared services.
- Collaborated with various other teams to discuss the banking architecture and to build a safe and secure environment for the application.
- Prioritized AI based (Claude) development and written in-sprint automation as part of developing features.

reach52 Pte. Ltd.

Singapore, Remote (01/2022 - 11/2024)

Full Stack Engineer with a proven track record of developing robust applications for data management and insightful data presentation. Proficient in utilizing a comprehensive technology stack including Microservices architecture, Node.JS, NextJS, Express.js, AWS services, Angular, TailwindCSS, React, Redux, and project management tools like Jira and Bitbucket.

- Developed and deployed microservices-based applications using Next.JS and Node JS (Express) (JavaScript/TypeScript), MongoDB, leveraging AWS services such as EC2, EKS, ElastiCache, Lambda, RDS and S3.
- Implemented responsive user interfaces with Angular, React, and Redux integrating TailwindCSS for UI development and enhanced user experience.
- Collaborated closely with cross-functional teams, including product managers, designers and QA, to understand project requirements and deliver solutions that meet business objectives.
- Utilized Jira and Bitbucket (Git) for project management, ensuring tasks are organized, tracked, and completed efficiently within agile development cycles.
- Conducted code reviews, maintained documentation, and performed testing to ensure code quality, scalability, and reliability of applications.
- Made use of Jenkins and Bitbucket pipelines, Docker, and Kubernetes (K8s) to implement CI/CD pipelines.

Tutorhow Scientific Edutech Pvt. Ltd.

Cochin, India (01/2020 - 12/2021)

Led a team of 3 developers and 2 Quality Assurance (QA) professionals, overseeing project development and ensuring quality standards. Engaged with a diverse technology stack to deliver robust solutions.

- Managed projects using technologies like Next.js (JavaScript TypeScript), Tailwind CSS, Laravel, MongoDB, MySQL, MariaDB, Redis, DynamoDB, and WebSockets to build efficient and scalable applications in NodeJS, PHP, Python and BASH.
- Integrated real-time communication tools for video and audio interactions in web applications.
- Leveraged AWS services (EC2, S3, SES, RDS, ElastiCache) for reliable cloud-based solutions.
- Developed mobile apps using React Native to deliver user-friendly experiences.
- Collaborated with stakeholders to define project goals and deliver solutions on time.
- Conducted code reviews and provided mentorship to team members.
- Managed deployment processes to streamline project delivery and improve efficiency.
- Resolved technical issues and optimized application performance to enhance user experience.

Infosys Ltd.

Bangalore, India (06/2019 - 01/2020)

Modified existing web applications written in Python and provided technical support and assistance to end-users utilizing the ServiceNow platform. Responded to and resolved customer inquiries and issues related to ServiceNow applications and functionalities.

- Provided technical support and assistance to end-users utilizing the ServiceNow platform.
- Responded to and resolved customer inquiries and issues related to ServiceNow applications and functionalities.

Projects

reach52 insights | 2023 - Present **reach52 insights** is a **closed platform** for clients to monitor ongoing projects. The primary objective is to **graphically showcase analytical and statistical data** in human-friendly formats.

- **Tech Stack:** NodeJS, React, Redux, React-Bootstrap, ExpressJS, and PostgreSQL.
- **Deployment:** AWS EKS using Bitbucket Pipelines.

reach52 connect | 2022 - 2023 An **internal application** for the business administration team to create campaigns and manage daily activities. It was designed to **automate and manage unorganized activities**, such as user tracking and campaign management.

- **Tech Stack:** NodeJS, Angular, Material UI, Express, and MongoDB.
- **Deployment:** AWS EC2 using Jenkins CI/CD.

Tutorhow Virtual Front Desk - Lead Management System | 2020 - 2021 A **Progressive Web App (PWA)** that acts as a container for the ETO app, providing **performance and security improvements**.

- **Tech Stack:** NextJS (Full Stack), Golang (Backend functions).
- **Databases:** MongoDB, Neo4J, MySQL, and Redis.

Tutorhow Training Mobile App | 2019 - 2021 A **white-labelled mobile app** developed for clients to run their own training institutes.

- **Tech Stack:** React Native.
- **Infrastructure:** MongoDB (Atlas Cloud) and AWS Lambda (Serverless).

Tutorhow ETO | 2019 - 2021 An **online class platform** allowing teachers to market systems under their own brand and collect student fees. It features **student management, assignments, and scheduling**.

- **Tech Stack:** PHP Laravel, NodeJS, HTML, CSS, Bootstrap, and jQuery.
- **Databases:** MySQL and DynamoDB.
- **Deployment:** Unmanaged VPS using BASH and SSH.

Core Competencies

- **Strong knowledge** of **algorithms, data structures, and software architecture design**.
- **Fluent in English** with excellent **collaboration skills** in team environments.
- Expert in **problem-solving, troubleshooting, debugging, and optimization**; focused on writing **clean, well-documented code**.
- Proven ability to **learn and apply new technologies** quickly.

- **Cloud & Servers:** Amazon Web Services (AWS), Azure, GCP, and Linux/Windows server management (including Web server management and Server setup).
- **Frontend & Core Web:** HTML, JS, CSS, SASS, SCSS, Bootstrap, jQuery, JSON, XML, and YAML.
- **APIs & Data:** REST API, GraphQL, Apache Kafka, and Protobuf.
- **Databases (SQL & NoSQL):** MongoDB, MySQL, MariaDB, Neo4J, PostgreSQL, Redis, and DynamoDB.
- **Performance:** Load Optimization and system efficiency.
